

UN Certified Lidded Containers

UN Certified containers tested under the harshest of circumstances by an external laboratory & approved for the transport of dangerous solids & liquids within packaging groups I, II, & III.

Certified to Your Needs

If you have specific needs we can develop a UN grade solution for you.

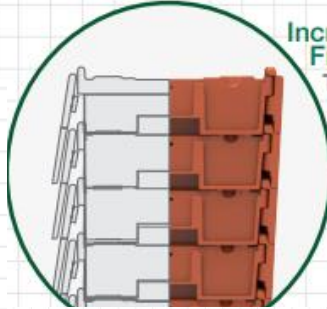

Certified for Solids & Liquids

Each of the UN Certified containers can be used to transport Liquids with the use of an insertable UN Certified Bag.

Increase Vehicle Fill up to 10%

The UN Certified Container adopts our innovative ALC lid design with 100% tessellation, capable of saving up to 10% when storing or transporting empty containers.

Branding Available

Alternative Colours as well as digital & hot foil Printing available (MOQs Apply)

Compatible with the Pally & Lid System

The UN Certified range works in conjunction with the Pally & Lid for ultimate security and manoeuvrability of hazardous materials.

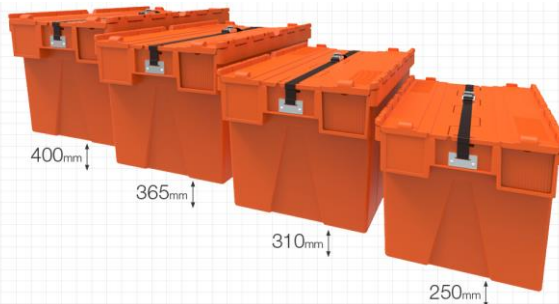

Integrated Straps

Integrated straps permanently fixed to the container enable easy UN level containment & safety for hazardous materials.

UN Certified ALC Range

Container's approved payload depends on certification... See spec sheet for more information
